Pre nekoliko godina Angus meso je doživelo bum u velikim svetskim lancima restorana kao svojevrsni delikates i nešto što je do tad bilo rezervisano samo za specijalizovane stejk i gril restorane. rasa Black Angus goveda svoju izdašnost i kvalitet u muskulaturi duguje upravo svežoj ishrani, pa ne čudi zašto je ovo meso bogato nutrijentima, a ukus fantastičan. Ono što ga čini izuzetno sočnim je mramorisanost ili prošaranost masnoćom. Uzgoj ove rase je strogo kontrolisan i kao takav spada u grupu namirnica koje se, između ostalog, zbog načina odgoja odlikuju visokim kvalitetom.
